

Network Promotion

- The website went live in the spring 2025; we are continuously making improvements based on user feedback. Working toward a hard launch of the site in the coming months, we have applied to NL SUPPORT for assistance with developing & managing a more robust site.

Data, People, Priorities

- Digital Health Services are reviewing the CPCSSN protocols re: feasibility for **CPCSSN data transfer**. A representative from this group will be invited to our next leadership committee meeting for an update.
- Collection of PREMS/PROMS are currently being pilot tested with physicians in NL via the **CPIN project** - 4 of a required 10 physicians have been recruited.
- Stephanie is finalizing a communication plan to accompany the **network structure diagram**.

Research

- Stephanie's initial search has identified a number of researchers working on primary care projects; we are in the process of following up with them to confirm information about their projects and their interest in being included in our inventory.
- Andrea and Stephanie are about to support our first interest-holder engagement plan for a PRIIME-supported FCT project.
- We have connected with the FCT resource hub about a potential funding opportunity to support organizations who are aiming to improve team-based care in clinics.
- Brad submitted the Diabetes rural scoping review manuscript for publication.

Quality Improvement

- Amanda, Andrea and Mona developed 3 **key resources** to support 35 family medicine residents to undertake a QI project related to reducing no shows in the province. The results of the 35 projects will be presented at the **Family Medicine Resident's Forum** in November 2025; we will develop a summary of the findings infographic to showcase their work.
- Amanda and Andrea are working up a protocol to assess family physicians' perspectives of QI, specifically related to the CPCSSN data presentation tool.

Knowledge Translation and Exchange

- Mona and Stephanie are preparing the next research snapshot on a study investigating barriers to deprescribing opioids in family medicine.
- We have introduced a new KT product featured on the PRIIME website - one-page descriptions of projects in progress (PiPs). PiPs will focus on priority topic projects only.

Next meeting: December 2025
