

PRIME

Inputs

Funded leadership

Faculty + Interest-holder representatives supported by existing institutions/groups

Key support staff positions

Activities

Support development of primary care data systems, inclusion of diverse interest-holders, & research + QI priorities

Catalogue and support patient-oriented research

Support local quality improvement

Synthesize & translate knowledge for key audiences & support knowledge exchange

Outputs

Inclusive & representative data system + interest-holder network

Interest-holder groups understand and accept priorities

Evaluation-ready primary care system with interest-holder engagement

QI enabled practices & province-wide QI action plans

KT products/programs established, communicated, and accessed

Outcomes

Better primary care data for practice, research, and QI (P2D)

Increased relevancy of primary care research and QI

Improved capacity for primary care research and interest-holder engagement

Increased practice innovation and improvement (K2P)

Improved access to knowledge to inform evidence-based policy and practice change (D2K)

Impact

Improvements to the Quintuple Aim

Provider experience

Population outcomes

Patient experience

Efficiency

Equity

Data, People, Priorities

Inputs

Funded leadership

Faculty + Interest-holder representatives supported by existing institutions/groups

Key support staff positions

Activities

Improve process of providing NL EMR data to CPCSSN

Support the addition of PREMs, PROMs, and SDOH data to the primary care data system via test sites

Identify appropriate structure for our interest-holder connections

Set priorities for research and quality improvement

Outputs

All primary care clinicians & patients contributing data

Test sites include PREMs, PROMs, and SDOH data

Efficient interest-holder recruitment & retention

All interest-holder groups understand and accept priorities

Outcomes

Research and QI work based on representative population data

Increased numbers and representation of interest-holders

Improved interest-holder representation

Projects will address bottom-up NL-based needs

Impact

Improvements to the Quintuple Aim

Provider experience

Population outcomes

Patient experience

Patient-oriented Research

Inputs

Funded leadership

Faculty + Interest-holder
representatives
supported by
existing
institutions/groups

Key support staff positions

Activities

Assist researchers
with funding
applications

Assist researchers
with project set-up

Assist researchers to
initiate interest-holder
engagement plans

Outputs

Primary care projects
are submitted with
approved patient
engagement plans
and a letter of support

More efficient process
for project set-up
(e.g., ethics,
recruitment)

All primary care
projects have robust
& feasible interest-
holder engagement
plans

Outcomes

Quicker project set-
up, improved
recruitment &
reduced loss to
follow-up

Co-design of primary
care research &
knowledge translation

Reduced redundancy
in work efforts &
increased collaboration

Impact

Improvements to the Quintuple Aim

Quality Improvement

Inputs

Funded leadership

Faculty + Interest-holder
representatives
supported by
existing
institutions/groups

Key support staff
positions

Activities

Assess CPCSSN DPT
for usefulness in
practice

Assist DFM with
provincial QI priority
topic

Outputs

FPs satisfied and
accept report

Increased awareness
& application of QI
methods in practice

Outcomes

FPs interact and use
reports for regular CQI

Increased QI
knowledge, skills, and
confidence

Impact

Improvements to the Quintuple Aim

Provider
